## Education

|                                                                         |            |
|-------------------------------------------------------------------------|------------|
| <b>Bachelors of Science in Computer Science</b> – UET, Taxila, Pakistan | 2019– 2023 |
| <b>Intermediate</b> – 502 Model College, Rawalpindi, Pakistan           | 2016– 2018 |
| <b>Meta Frontend Developer Specialization</b> – Coursera                | 2022– 2023 |

## Professional Summary

Passionate about web development since 2020, I specialize in crafting dynamic and user-centric solutions. I approach problem-solving with proactive diligence, consistently delivering high-quality code. My commitment to continuous learning ensures adaptability and proficiency in various web development endeavors. Excelling in building interactive user interfaces and optimizing experiences, my detail-oriented approach enhances project success.

## Work Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                      |
