EXPERIENCE

Full stack Developer

Sigma Square AI 01/2025 - Present Islamabad, Pakistan. (Hybrid)

- Contributed to AI-powered full-stack applications using Angular, Next.js, Node.js, and Supabase, building scalable, high-performance platforms with multi-tenant architecture and role-based access control.
- Developed and optimized frontend and backend features, including an AI-driven online course generation platform, improving scalability, reliability, and overall user experience.
- Enhanced application performance through efficient API design and data-fetching strategies using SWR, resulting in faster and more reliable user interactions.
- Worked with AWS cloud services, deployment pipelines, and CI/CD workflows to streamline development, testing, and release processes.
- Collaborated with cross-functional teams to integrate AI-driven solutions, improving automation, content generation, and user engagement.

Software Developer

N17 Solutions 01/2024 - 01/2025 Lahore, Pakistan(Remote)

- Actively redesigning the company's digital portfolio, resolving bugs in the initial codebase, and implementing CMS integration for efficient blog management
- Developing a system to capture and organize client leads data, enhancing data management processes for improved client engagement and business development

Full Stack Developer

Flyeats 11/2022 - 12/2023 London, United Kingdom. (Remote)

- Developed and enhanced the company's digital portfolio, including a redesign of the Digital Ordering platform, leading to improved user experience and overall functionality
- Implemented various SAAS solutions and created Dashboards from scratch, contributing to the technical innovation and adaptability of the development team
- Resolved over 50 bugs in the codebase, actively participating in code enhancements, pull requests, and the introduction of new features, ensuring higher software quality and functionality

IT Intern

Fauji Foundation 08/2022 - 09/2022 Rawalpindi, Pakistan (On-Site)

- Developed the frontend of a web application during an internship, building a platform similar to Airbnb for short-term homestays in Pakistan.
- Implemented features on the frontend, such as real-time availability display using Mapbox integration, enhancing the user experience and interaction with the platform
- Established authentication functionality, integrating with various authentication providers like GitHub, Google, and Facebook to ensure secure user access and interaction

SUMMARY

Full Stack Developer specializing in building scalable, AI-powered web applications. I focus on designing high-performance systems with clean architecture, reliable APIs, and optimized frontend-backend integration. Experienced in working with AWS cloud infrastructure, CI/CD pipelines, and modern deployment workflows to deliver scalable and production-ready applications. I enjoy solving complex engineering problems, improving system performance, and building user-centric digital products that combine AI and modern web technologies. Currently focused on advancing in full-stack engineering, cloud systems, and AI integration to build impactful, scalable software solutions in real-world environments

TRAINING / COURSES

META Frontend Developer Specialization

Coursera

EDUCATION

Bachelors of Science in Computer Science

University of Engineering and Technology
Taxila

02/2019 - 02/2023 Taxila, Pakistan

Intermediate HSSC (ICS)

502 Model College

01/2016 - 01/2018 Rawalpindi, Pakistan

SKILLS

Next JS

Angular

Firebase

Supabase

Git Hub

Tailwind CSS

Docker

CI/CD

React JS

EC2/ECS/S3

Node JS

Express JS
